Method

$$H\Psi(E,r) = E\Psi(E,r),$$

$$|a_n\rangle \in \mathcal{L}^2 \quad \langle a_i | a_j \rangle = \delta_{ij}$$

$$\Psi(E,r) = \sum_{n=0}^{\infty} c_n(E) |a_n\rangle,$$

$$\sum_{n'=0}^{\infty} (H_{nn'} - \delta_{nn'} E) c_{n'}(E) = 0$$

PET (phase-equivalent transformation)

$$[\tilde{H}] = [U][H][U^\dagger]$$

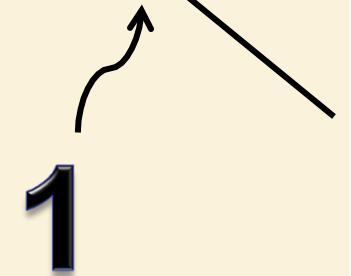

$$[U] = [U^0] \oplus [I]$$

$$U^0 = \sum_{i,j \leq N} |a_i\rangle U_{i,j}^0 \langle a_j|$$

$$\Psi(E, r) = \sum_{n=0}^{\infty} c_n(E) |a_n\rangle,$$

$$\widetilde{\Psi}(E, r) = \sum_{n=0}^N \widetilde{c}_n(E) |a_n\rangle + \sum_{n=N+1}^{\infty} c_n(E) |a_n\rangle$$

U⁰

DET-PET

(deuteron-equivalent phase-equivalent transformation)

$$[\tilde{H}] = [U][H][U^\dagger]$$

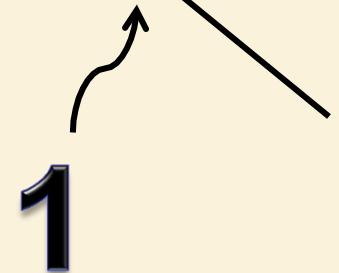

$$[U] = [U^0] \oplus [I]$$

$$U^0 = \sum_{i,j \leq N} |a_i\rangle U_{i,j}^0 \langle a_j|$$

$$\Psi(E, r) = \sum_{n=0}^{\infty} c_n(E) |a_n\rangle,$$

$$\widetilde{\Psi}(E, r) = \sum_{n=0}^N \widetilde{c}_n(E) |a_n\rangle + \sum_{n=N+1}^{\infty} c_n(E) |a_n\rangle$$

U⁰

U |d⟩ = |d⟩ |d⟩ — deuteron wave function

DET-PET

(deuteron-equivalent PET)

$$U^0 = \sum_{i,j \leq N} |a_i\rangle U_{i,j}^0 \langle a_j|$$

$$|a_i\rangle = \sum_{l \leq N} a_i^l \varphi_l$$

$$\langle a_i | a_j \rangle = \delta_{ij}$$

$$\langle a_i | d \rangle = 0, \quad i \leq N$$

$$|a_i\rangle = a_i^n \varphi_n + a_i^m \varphi_m + \dots$$

$$|d\rangle = d^n \varphi_n + d^m \varphi_m + \dots$$

DET-PET

Simplest case: U — 2×2 matrix

$$|a_1\rangle = a_1^n \varphi_n + a_1^m \varphi_m$$

$$a_1^n = \frac{d_m}{\sqrt{d_n^2 + d_m^2}}$$

$$a_1^m = -\frac{d_n}{\sqrt{d_n^2 + d_m^2}}$$

$$|a_2\rangle = a_2^k \varphi_k + a_2^l \varphi_l$$

$$\det U_0 = +1$$

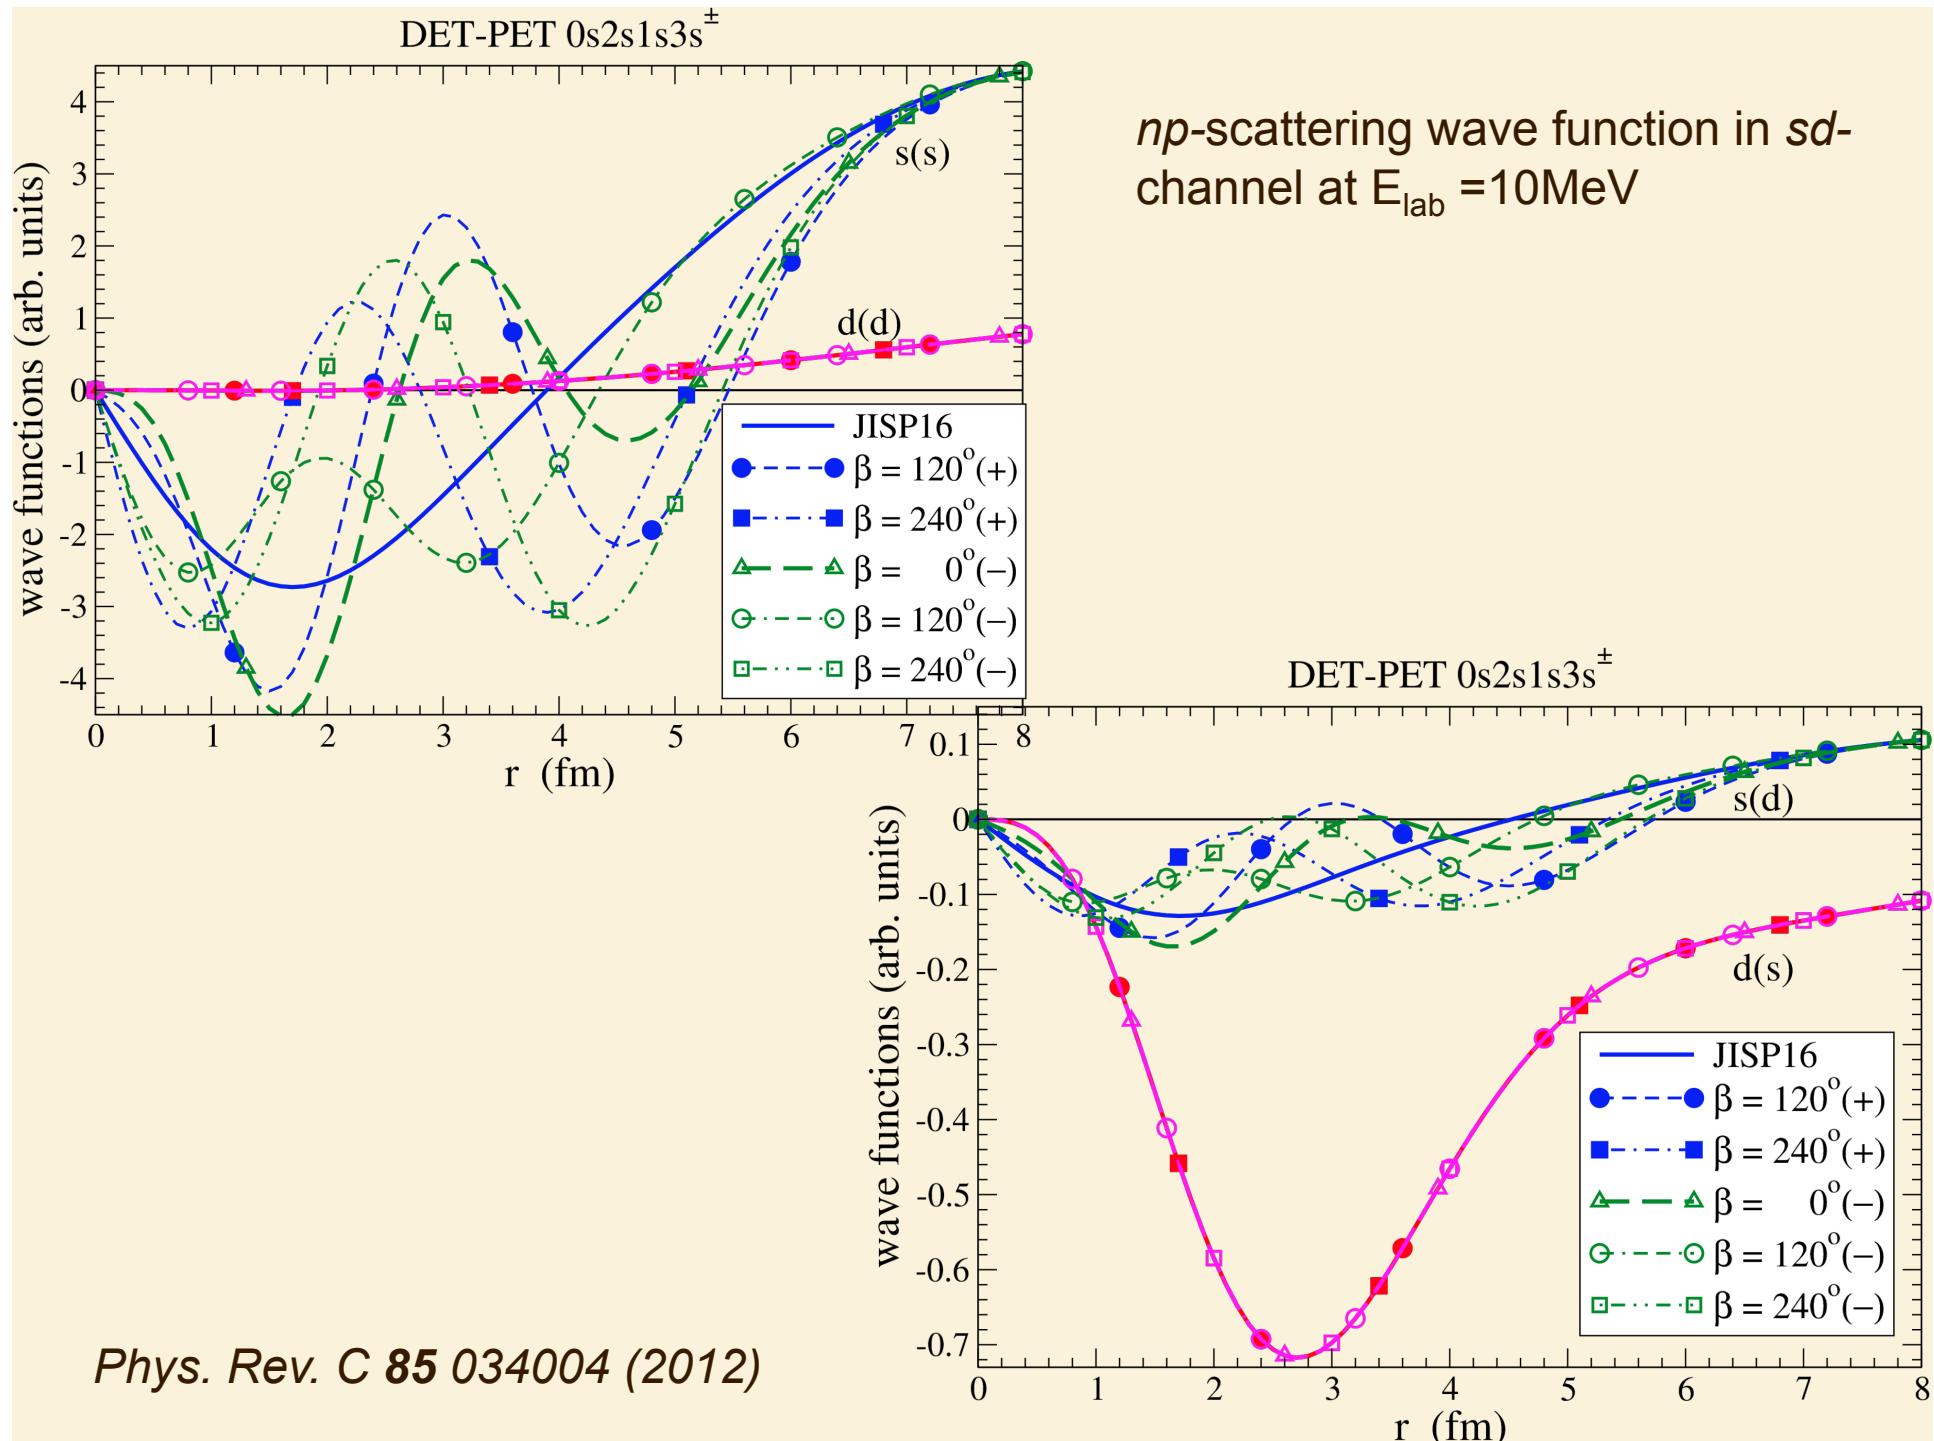

Rotation

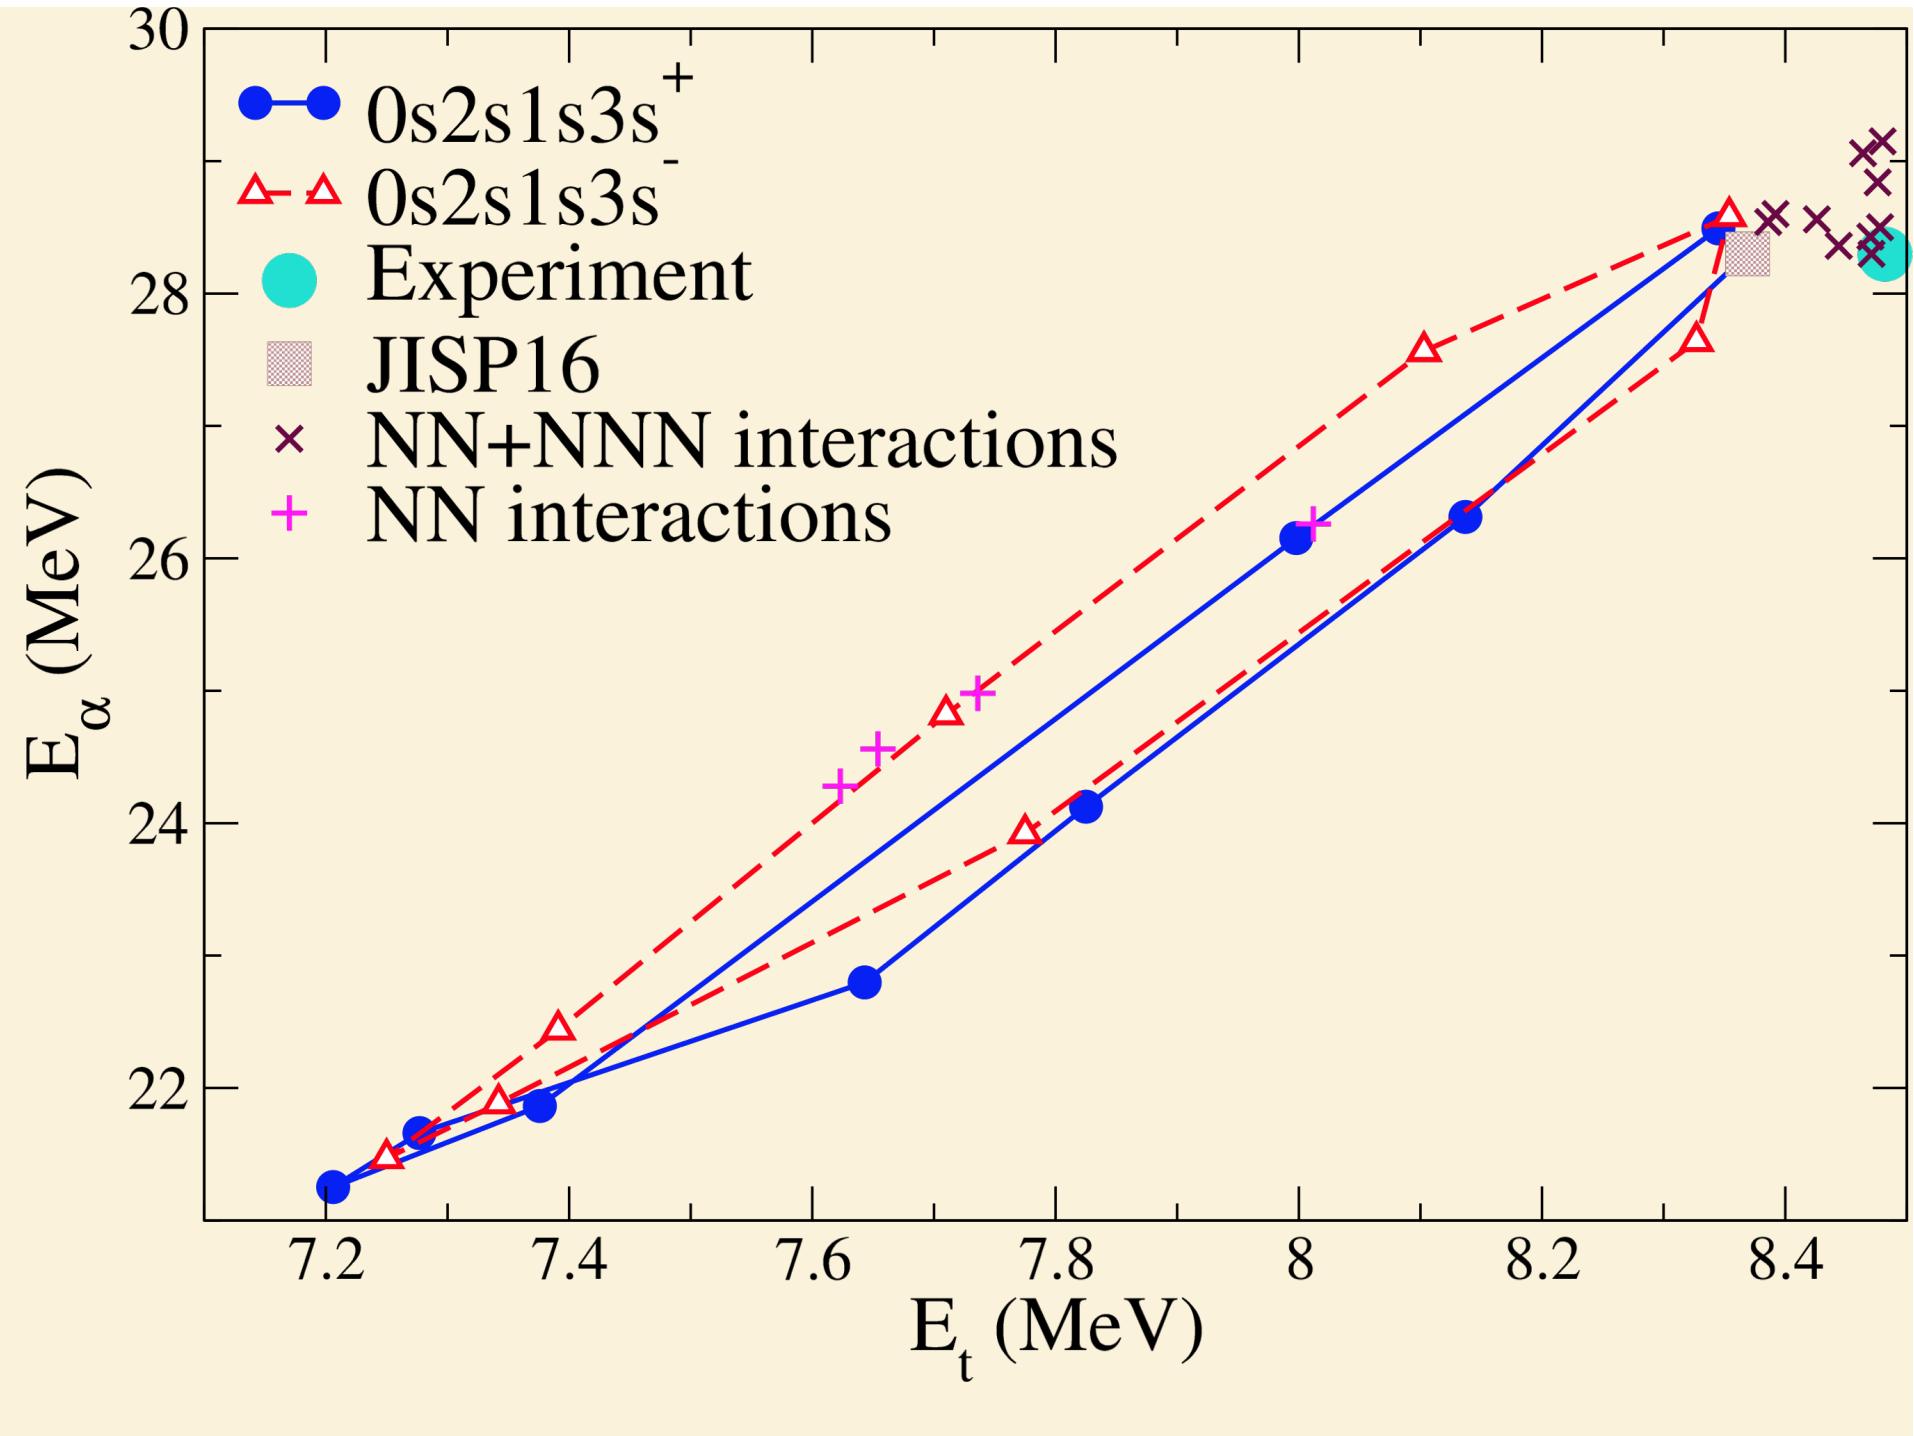

$$\det U_0 = -1$$

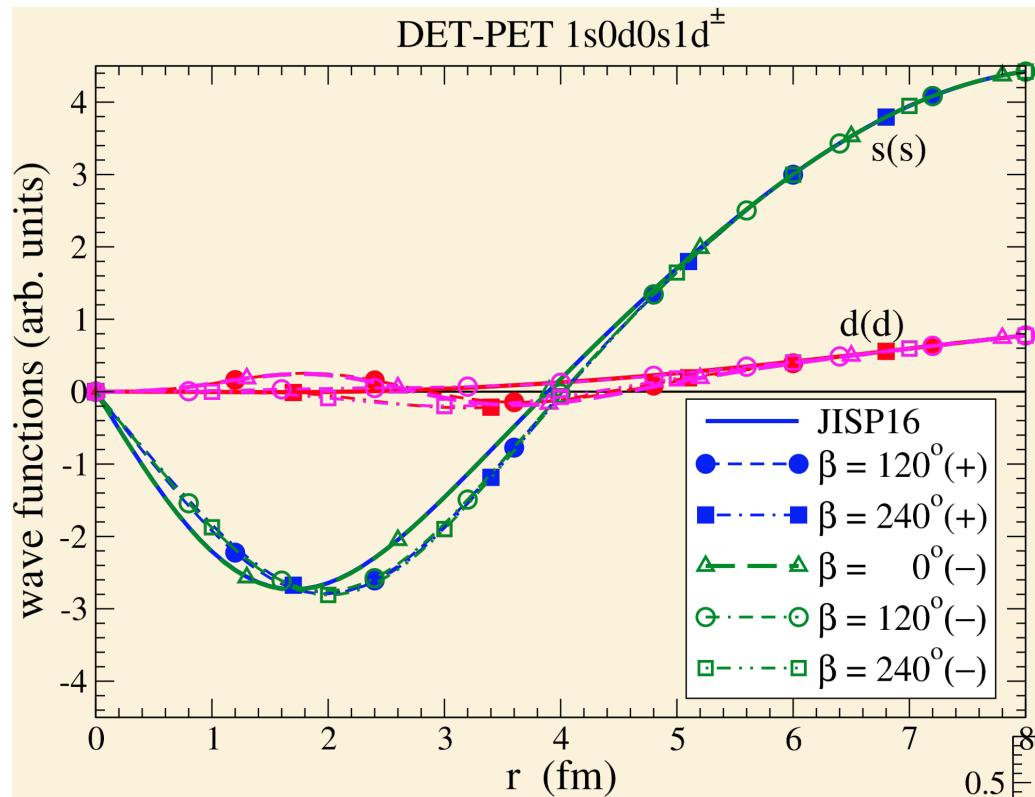

Rotation+reflection

Notations: $\varphi_n = 0s$, $\varphi_m = 2s$, $\varphi_k = 1s$, $\varphi_l = 3s$

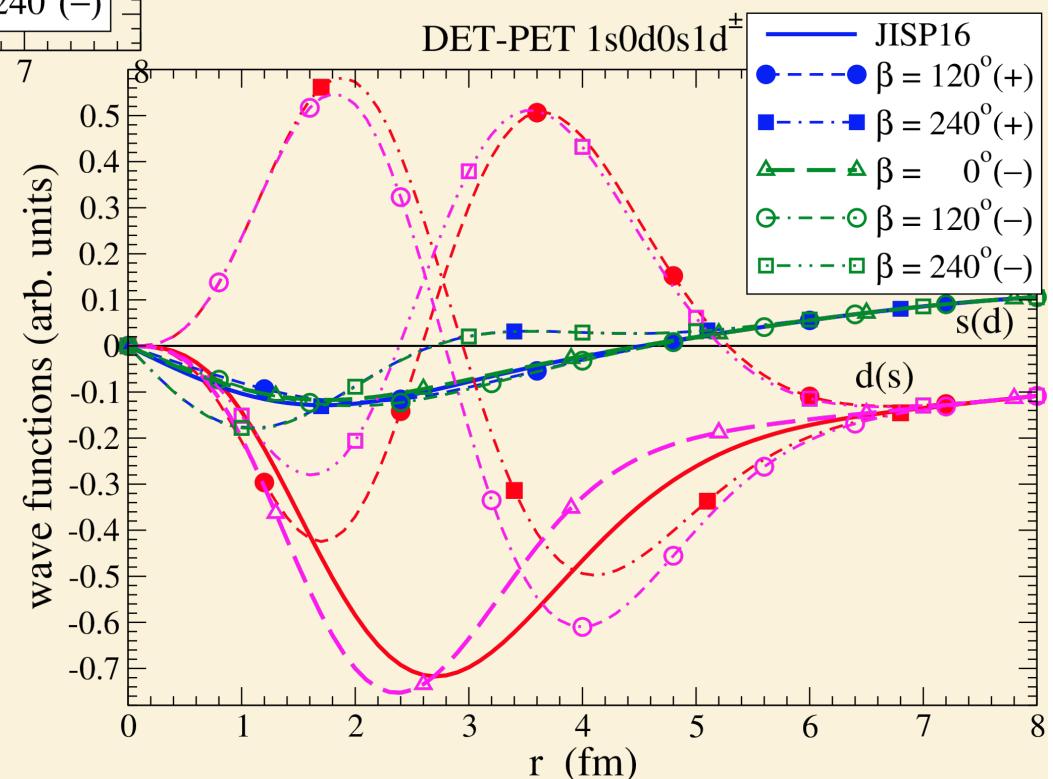

DET-PET 0s2s1s3s $^\pm$

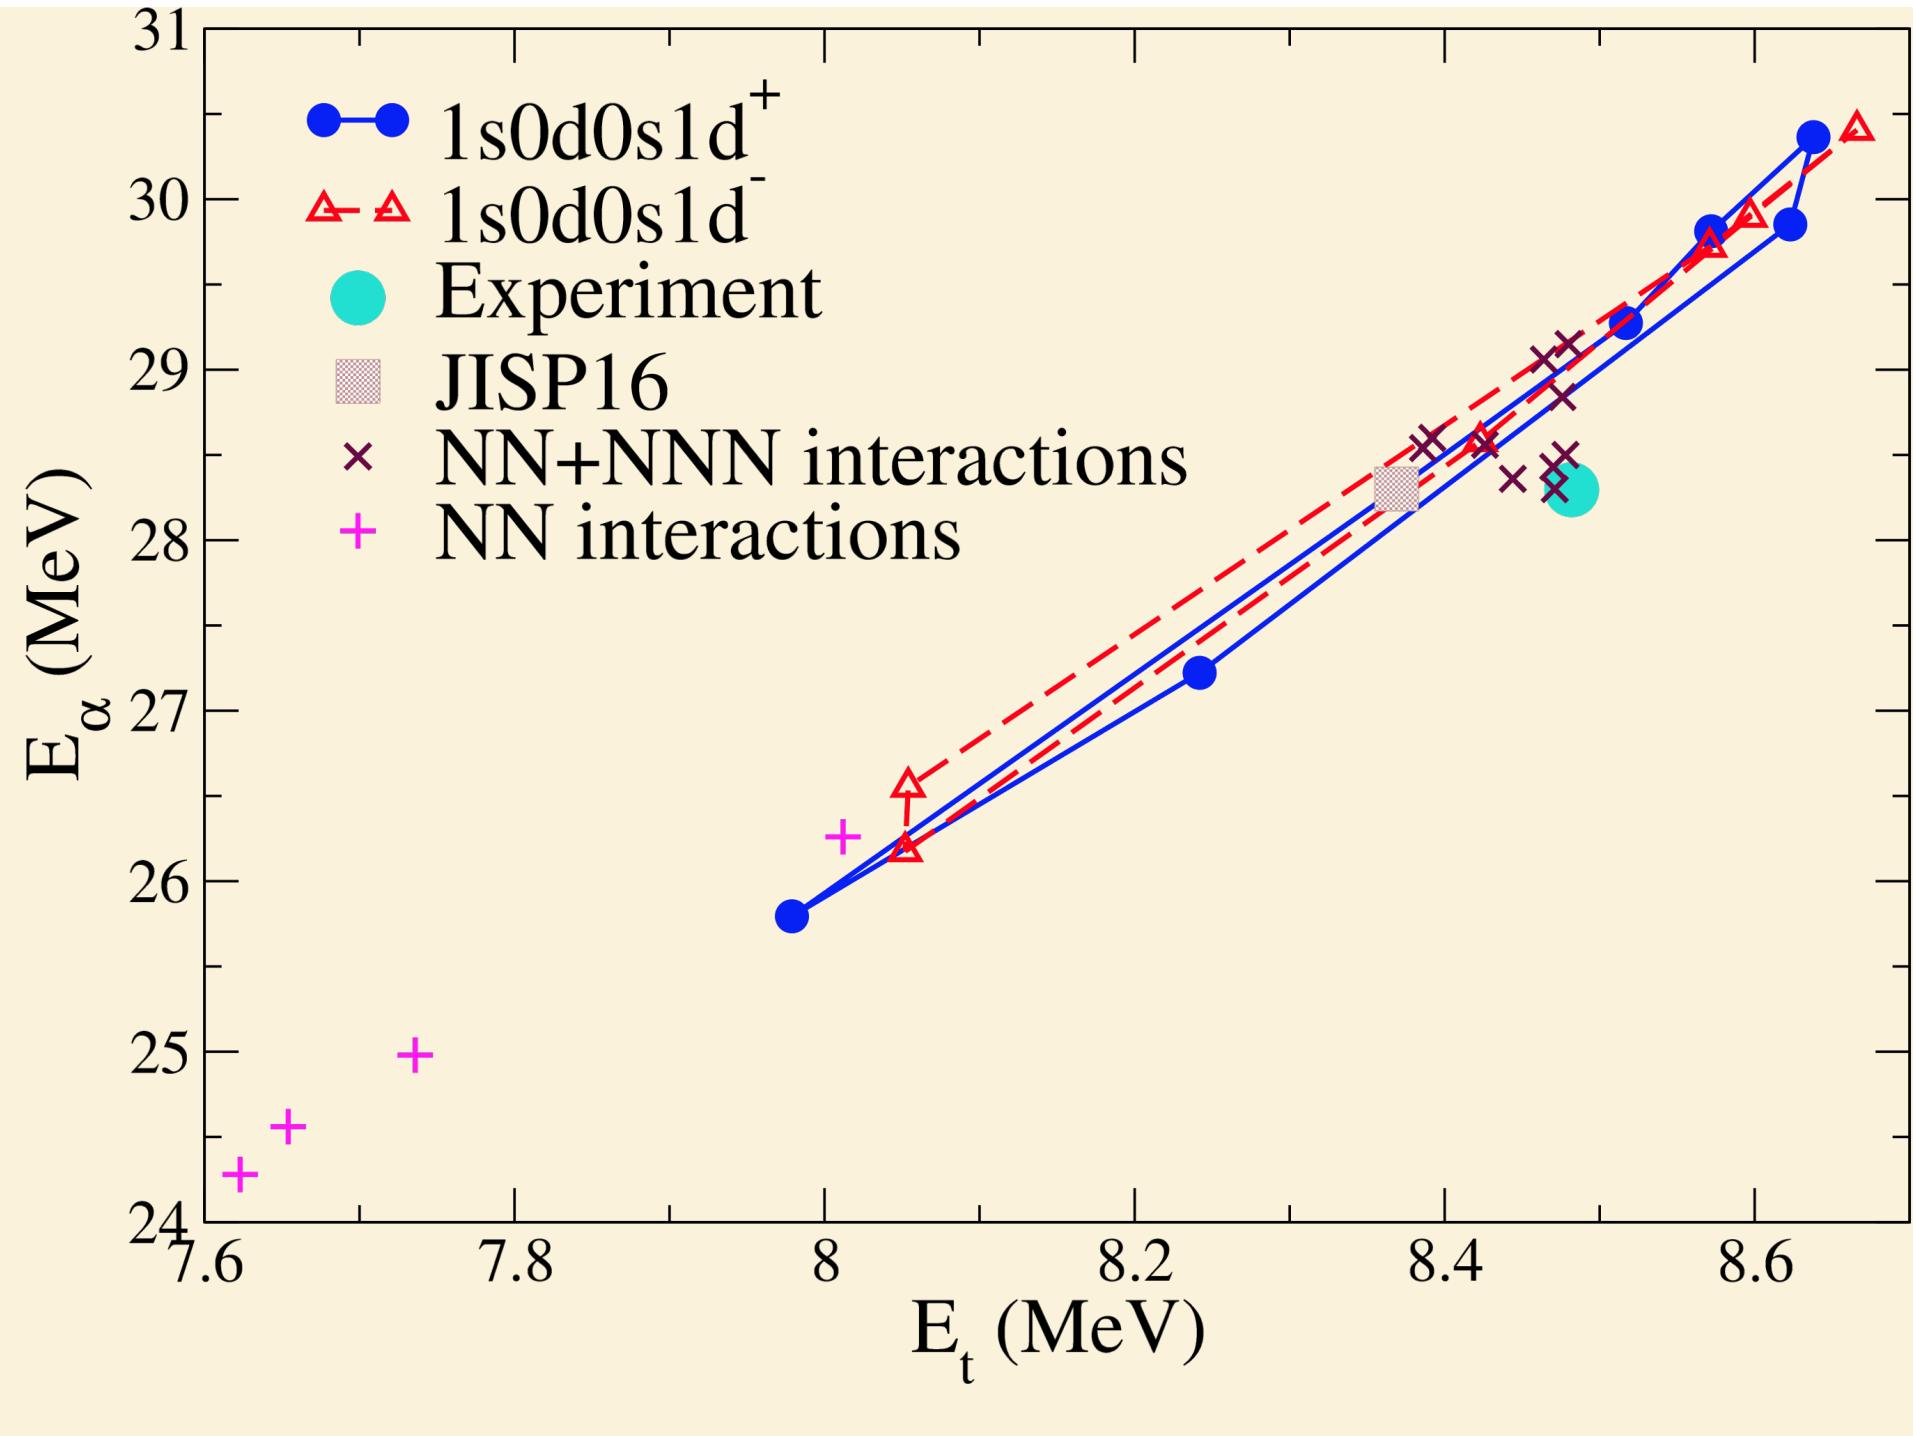

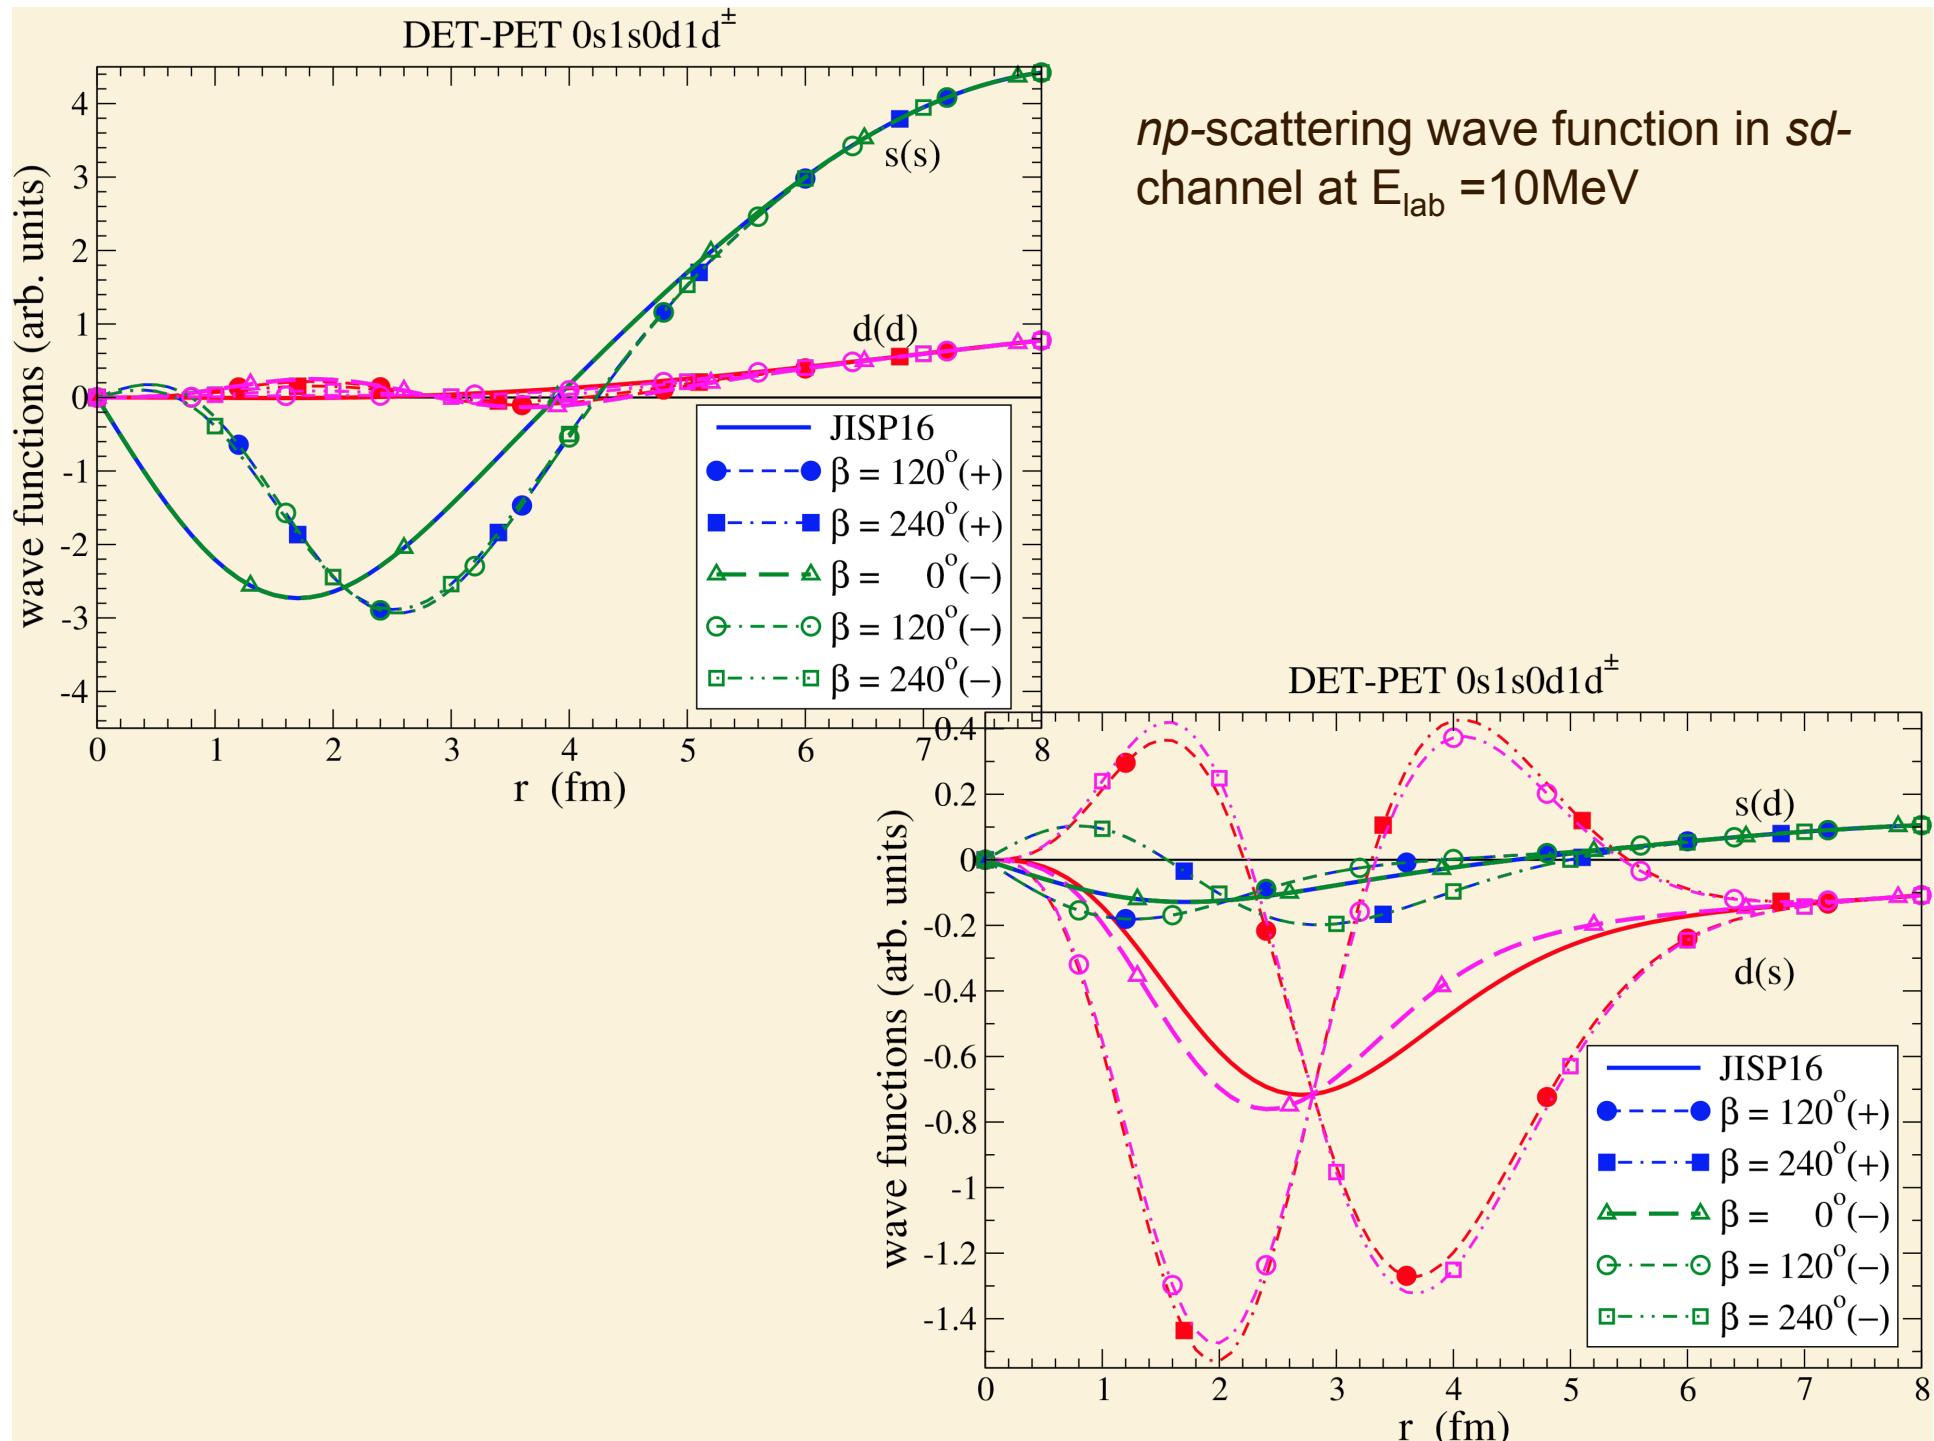

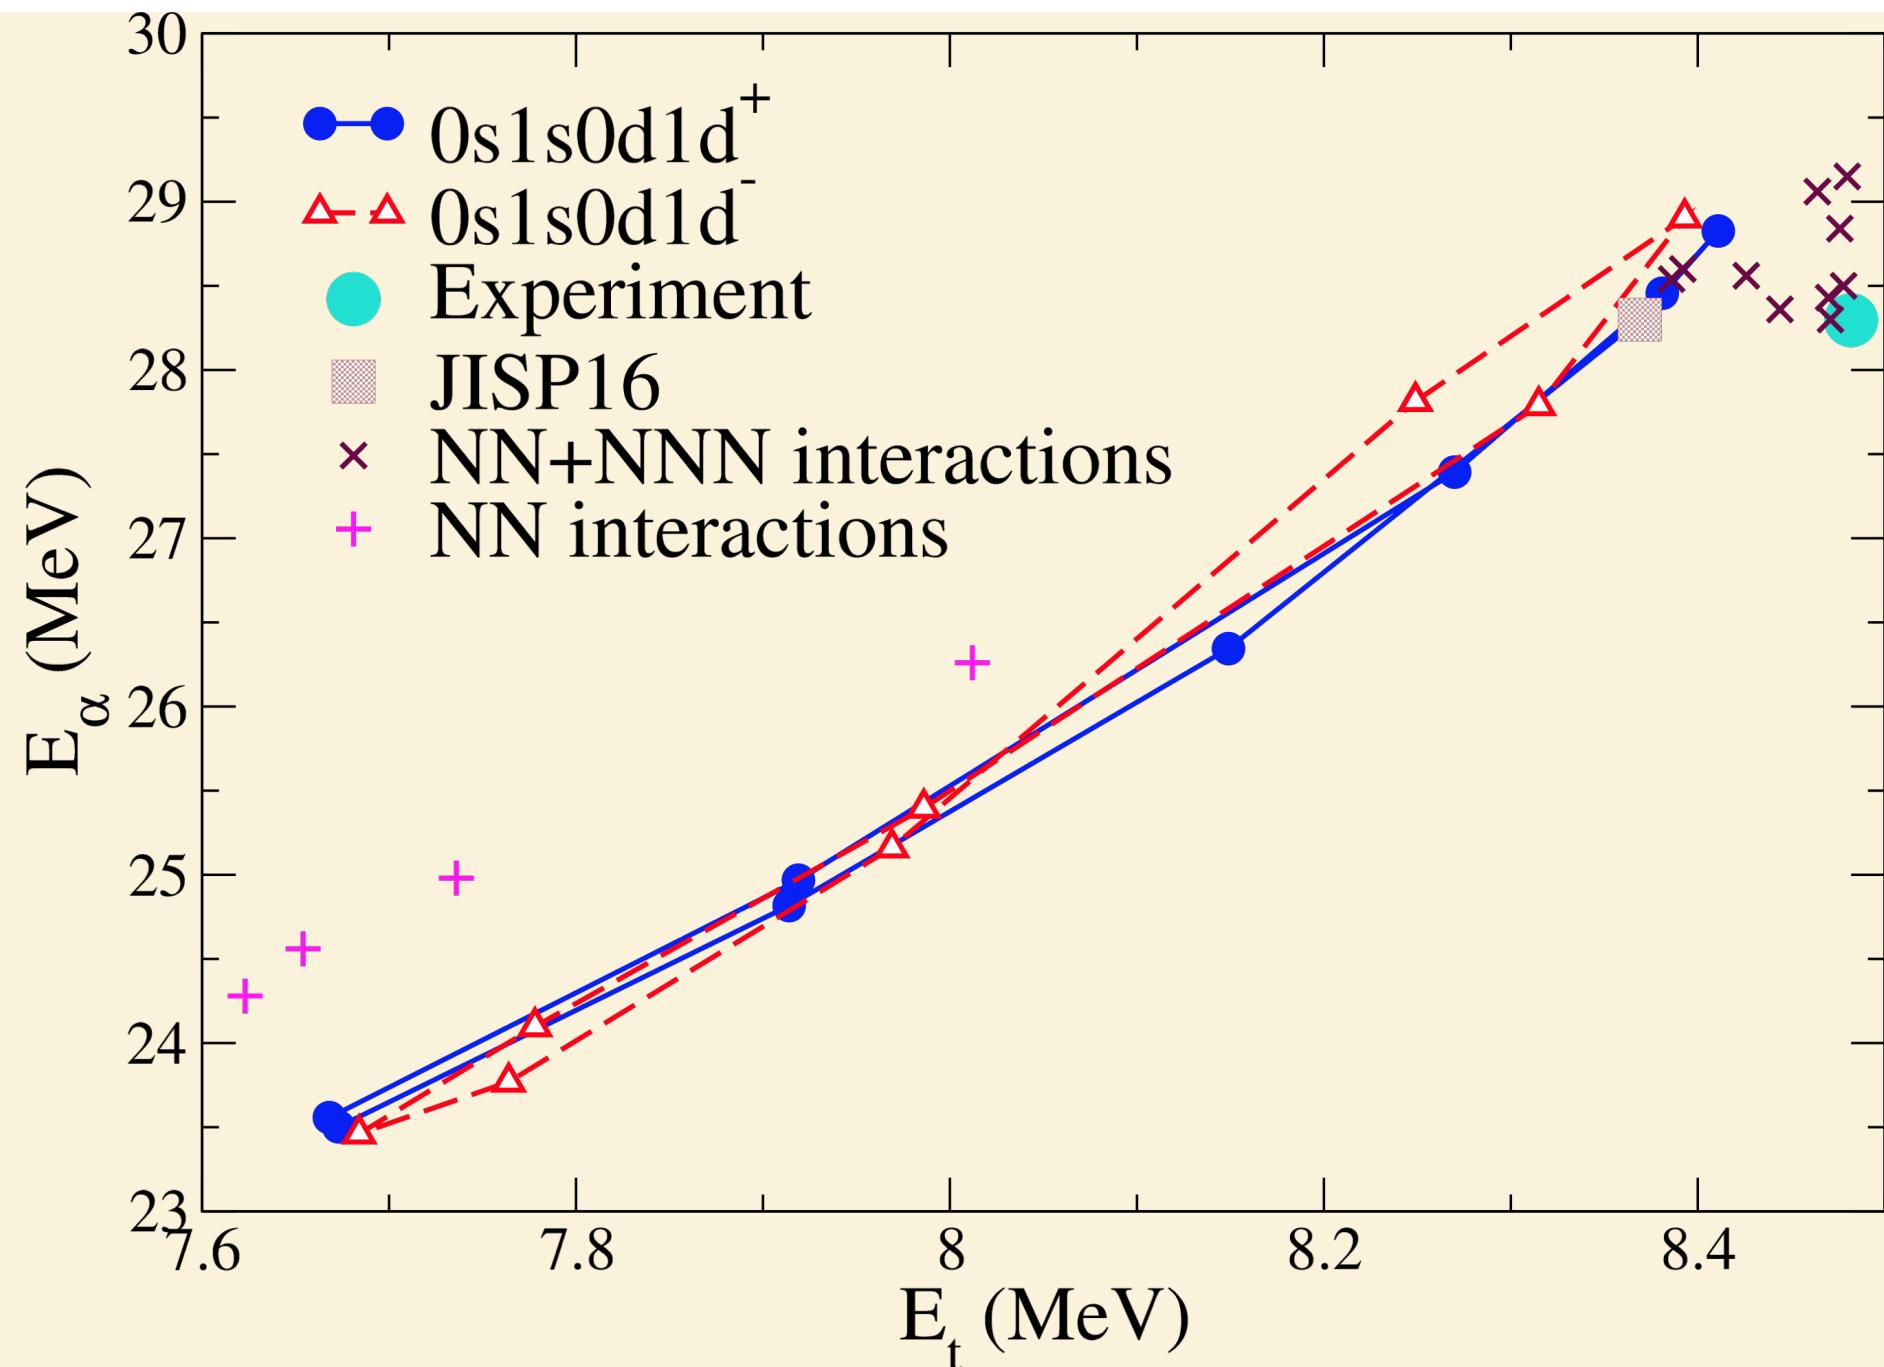

np-scattering wave function in *sd*-channel at $E_{\text{lab}} = 10 \text{ MeV}$

Thank you!
